Policy On Bio Diversity		
Policy No	Version No.	Effective Date
COHANCE/EHS/001	00	16.02.2023

OBJECTIVE

Biodiversity is variability among living organisms from all sources including diversity within species, between species and ecosystems.

The phases involved in the life cycle of API's Intermediates create a good impact on water, air, land, and the ecosystem depending on them. Being an environmentally conscious manufacturer of pharmaceutical products, Cohance lifesciences recognizes the impacts of its operational activities on the ecosystem and values its dependence on biodiversity.

Considering the strategic and tactical importance of biodiversity Cohance Lifesciences is committed to follow the implement the practices as described/specified by International Union for Conservation of Nature (IUCN) species by its sustainable management through systematic biodiversity assessment and biodiversity management including alien species.

STATEMENT

The concept of biodiversity in this factory value chain and adopt a precautionary approach for sustainable management of biodiversity in all decision-making processes so that the earth's variety of life is ensured in and around the organization.

APPLICABILITY

The organization and each employee are a partner in implementing the policy.

PRINCIPLES

This policy is guided by the following principles:

- Considering biodiversity in all its operations and business decisions right from planning to operations and closure of sites.
- Aiming at the continual improvement of biodiversity.
- Provision of accountability in all locations and creating systems to respond to any aberration.
- Minimization of adverse impacts on biodiversity through best industry practices and technologies for e.g., developing green areas, and training employees on topics of biodiversity and more.
- Capacity building through inclusiveness and regular knowledge sharing on biodiversity with employees and concerned stakeholders.
